Compass House offers people living with mental illness hope and opportunities to reach their full potential. Participation in Compass House and all of its activities is voluntary and each member chooses the way that they utilize the clubhouse. We offer a wide range of opportunities to members during the work ordered day including skill building and assistance with employment, education and housing. Compass House offers social and recreational opportunities on some evenings and weekends and we are open on all major holidays.

Compass House provides a safe environment for all members to come and participate. Compass House requires participants to be 18 years or older, living with mental illness and not to pose a current threat to the clubhouse community.

After receiving a referral Compass House will contact the person being referred to schedule a tour. Members of the Mental Health Community are welcome and encouraged to take tours with the people that are being referred. *(Please print legibly)*
